HIGH VOLTAGE PROTECTION TRAINING SEMINARS

WHAT OUR SEMINARS OFFER:

Our seminars provide a working knowledge of High Voltage Protection (HVP) design, installation, and service. Realistic techniques, from over 35 years experience of the author, cover state-of-the-art communication services into power substations and PCS sites located within power line right-of-ways. These techniques can be economically applied with a high degree of safety and service assurance.

WHO SHOULD ATTEND THE SEMINARS:

TELEPHONE, POWER, and PCS company engineers, managers, and maintenance individuals who coordinate or service power company high voltage locations and or PCS radio cell sites.

PREREQUISITE SKILLS AND KNOWLEDGE:

An understanding of electricity, communications, and math is helpful, but is not required. Basic HVP technology and telecommunication design skills that apply are reviewed in the seminar.

<u>SEMINAR</u>	<u>LENGTH</u> (Student numbers)	<u>>36*</u>	<u>FEE STRUCTURE</u>	
			<u>16-35</u>	<u>1-15</u>
HVP-ENGINEERING	2 DAYS	\$495	\$545	\$645
HVP-INSTALLATION	2 DAYS	\$445	\$495	\$595
HVP-SERVICE	1 DAY	\$295	\$345	\$395

IN-HOUSE Seminars will be suitcased to any CUSTOMER PROVIDED training facility.

OPEN Seminars[#] will be suitcased to various locations provided by us.

All seminars must have a minimum registration of 15 students.

Fees include all course materials and manuals, as well as instructor travel expenses. All fees are US\$ for seminars held in the lower 48 States. Contact us for fee structures at other locations. Student registrations must be confirmed 30 days in advance, and if the 15 student minimum is not obtained a 20 day cancellation notice will be issued and fees returned.

Note* Fee for 36 or more students in two classes held the same week at the same location.

Note[#] OPEN Seminar fees must be paid in advance at the individual 15 student rate.
